

## HOW DOES IT WORK? XRP LEDGER

PetProof works using the XRP Ledger, a public block-chain that is fast, secure, and eco-friendly.

Because the ledger is decentralized, your pet's identification record cannot be erased, tampered with, or modified in any way without your permission.

The global XRP Ledger community—a diverse set of software engineers, server operators, users, and businesses—maintains the ledger.

## PETPROOF IDS ARE AVAILABLE AS A SCANNABLE QR CODE THAT CAN BE WORN WITH ANY COLLAR

Every day, pets are lost. Lost pets cause tremendous emotional and economic pain. Shelters are short-staffed and overrun, and the cost of maintaining animals at these shelters can be a huge burden on public funds. PetProof will solve this real world problem by leveraging the power of the XRP Ledger.

PetProof uses the XRP Ledger to tokenize the ownership of pets. The XRP Ledger has many advantages over other pet ID databases: it is decentralized, international, and fast - which makes it the perfect tool to register precious pet information. Competing services are at risk of going out of business, which would jeopardize the availability of their databases.
